Chris Silich

Creative Technologist & Front-End Developer

Chris is an excellent and skilled front-end developer with a design background. This allows him to do high-value technical work, with a perfectionist eye for user experience and user interface design.

He's fast learner, and a hard worker. He prides himself on being able to adapt quickly to face new design or development challenges and master ever-changing technologies and trends. He seeks to maintain a high level of quality in his work with a hard working attitude and a high attention to detail.

Technical Experience
